

Class Project

This is a project that encourages the child/ children to learn the Names and Attributes of Allah. The student is has to choose 2 names of Allah. They are supposed to define them and illustrate (within reason).

This is a project that encourages the child/ children to learn the Names and Attributes of Allah. The student is has to choose 2 names of Allah. They are suppose to define them and illustrate (within reason). The project you see has been completed by Ibrahim, my son. The center to the left is the name Ar-Razzaq the definition under it and the 5 ways to implement it and an ayat in the center. On the far left is the name Ar-Razzaq in Arabic and rain drops in each drop is an example of things Allah provides us with ... one says life and death, another is a picture of food, money, nature and your brain aql.... On the right side is Al-Maalik and the definition and 5 ways to implement it and an ayat in the middle. The far right has a crown surrounded by things Allah owns .. the earth and the sun , our hearts , people and skies the heavens and a little name tag ...

Hope it inspires some ideas
